
2022-11-03 Start: 15:30 UTC **End:** 16:30 UTC

Participants: Pete, Matt, Steve, Marty, Leo, Arnold

Main agenda

- Analytics - summary of our discussion at NANOG and path forward
- How can we improve the way we deliver feedback to people whose feature requests are not accepted? Could we give them feedback on whether a change to the feature is needed or whether it is completely rejected, and why?
 - Need to make sure the decision documented in GitHub is accurate and complete
- Should we place AS Number, or IXP/facility names, in the HTML title tags?
 - Create an issue and go through the usual process

Number	Title	Summary	Consent Finalized?
#607	Add location of Physical IX-Port & Router Port	<p>Is there a consensus on this summary?</p> <ul style="list-style-type: none"> ● The netixlan object is extended with <code>a_side</code> and <code>z_side</code> fields ● The <code>*_side</code> fields point to a <code>fac_id</code> ● Only the network operator (<code>net_id</code> owner) can set the <code>a_side</code> field to a valid <code>fac_id</code> of a <code>fac</code> they are present in ● Only the IX operator (<code>ix_id</code> owner) can set the <code>z_side</code> field to a valid <code>fac_id</code> of a <code>fac</code> the IX provides its service ● Both <code>a_side</code> and <code>z_side</code> are optional and may be <code>null</code> 	Get more input
#801	Add certifications/compliance to Network, Exchange and Facility objects	Adding a badge to show whether and how much a network or IXP implements MANRS actions.	No change
#1268	Post interaction feedback	Make it easier for users to give timely feedback by either clicking a thumbs up (or smile) or thumbs down (or frown) in a part of the screen that does not distract from the primary task. Allow users to also add a short comment. This will help us	Check with AC on existing feedback

		identify where improvement is needed and develop appropriate improvements.	
#1266	IX-F import server errors don't propagate to UI	A clear error message should show in the UI.	OK
#1270	Enable Google Analytics for beta.peeringdb.com	Test Google's Analytics product on beta and then review data and the tool before deciding what to use on production.	OK
#1277	Excluded ASNs - Cyclic confirmation of status on RIR Whois	Automatically remove ASNs when no longer registered in the RIR or NIR databases	Covered by #1271 which has consensus

Consent Agenda

Non-contentious issues that can be agreed in a single vote. Members can ask for an issue to be placed on the main agenda if they want it to have more discussion.

Number	Title	Summary	Consent Finalized?
#1260	Add Selenium Grid to CI testing	Automated testing for a broader range of browsers	OK
#1261	mysql8 tests	Ensure we are using stable version of MySQL	OK
#1266	IX-F import server errors don't propagate to UI	Bug: failed imports cannot be seen	OK
#1271	Implement auto-removal of stale networks according to DOTF recommendations	See: https://docs.peeringdb.com/gov/misc/2020-04-06_PeeringDB_Data_Ownership_Policy_Document_v1.0.pdf	OK
#1272	Add a button for IXes to flag a netixlan entry as bad	Improve data quality by allowing IXPs to report data for the regular AC dispute process	#170 is a more general version of this
#1273	Add a procedure for testing against production tagged code	Enable volunteer developers to integrate PDB to their end to end testing, especially for auth, against the production code.	OK

Informational

No action required. Members should be aware that these new issues have been agreed since the last meeting.

Number	Title	Summary	Ready for Implementation
#1275	Missing allowed sources for scripts	After deploying security improvements #1221 / #1242 we've noticed we're missing some sources that should be allowed for functionality. Currently have found /apidocs and captcha for registration, we're doing a full search to see if there's anything else.
