

2024-03-07 Start: 15:30 UTC **End:** 16:30 UTC

Participants: Arnold, Matt, Paul, Jack, Leo, Steve, Jeff

Apologies: Martin, Yan, Yolandi, Pete

Main agenda

- Chair Election
 - The board approved Jack as the new chair of the Product Committee
 - Thanks to Steve for his dedication over the last few years
- Decision: big changes and positive decision: recap and formal decision
 - Do we want to require internal and external users to confirm a positive experience with big changes in beta before deploying those changes to production?
 - JC: PC to decide what is a “big change”
 - What is “sufficient community input”
 - Leo to take first swing at doc
- Decision: [Deploy www on ECS/Fargate](#) to improve site responsiveness and better manage costs
 - Yes, as long as there are sensible caps to avoid cost overruns
- Decision: [API Cache Performance Fixes](#): either “Proposal A: Limit depth requests to a low number (10)” or “Proposal B: Fix performance issues based on rendering of depth 0 data.”
 - Need some more time to investigate
- Consider closing issues in “Decide” status that have not been commented on for 12 months
 - Proposal: A rolling process where the 12 oldest issues with no comments for 6 months or more are closed off. Update the issue noting that if it’s not commented on within a month it will be closed.
 - Deferred until next month
- Dedicate resources to addressing several [peeringdb-py issues](#). We want people to use a local cache when they can, so ensuring that peeringdb-py works well is important.
 - Propose scheduling 4 issues, estimated at \$1k to \$1.5k
 - Deferred until next month

Number	Title	Summary	Consent Finalized?
#1318	Carriers is missing from Advanced Search	Needs implementation discussion: what search options should we be adding?	YES
#1547	request ability to NOT display any "IPv4 Prefixes" and/or	AT&T/as7018 does not want to publish a recommendation for the number of	YES

Number	Title	Summary	Consent Finalized?
#1318	Carriers is missing from Advanced Search	Needs implementation discussion: what search options should we be adding?	YES
	"IPv6 Prefixes"	prefixes it originates	
#1543	Beta improvement: Move beta feedback to responder form or email alias	Reduce friction for users testing on beta to provide feedback	YES (www too if poss)
#1540	Google Earth KMZ Download to Thick Client Saved Hierarchy	Improve the hierarchy of fac data in Google Earth Pro	Investigate
#1539	Allow non-commercial non-public R&E (NREN) connection facilities	As title	NO
#1537	Feature Request: Add new network type "Personal"	As title	NO
#1522	Request: A Light/Dark/Auto Mode Toggle	As title	YES
#1516	'Report data' opens my mail client	#170 (removed from production) worked through a mailto link. This is a request for a fully web based solution.	#1543 solves this
#1477	MMR Object	As title	Deferred until next month
#1550	Remove "Media Type" field for Internet Exchange object	Clarify what people want to know: copper -vs- fiber or something else	YES
#1557	Add a Virtual IX Flag field to IX Object	Is the IX based on a switch fabric or not?	Deferred until next month
#1560	Add trust flag to accounts in PDB Deskpro tool to improve automation	Build a reputation for users that have demonstrated their trustworthiness in previous transactions, allowing faster processing for new transactions	Deferred until next month

Consent Agenda

Non-contentious issues that can be agreed in a single vote. Members can ask for an issue to be placed on the main agenda if they want it to have more discussion.

Number	Title	Summary	Consent Finalized?
#1535	Add Version Number to Beta code for Beta.Peeringdb.com	As title	NO
#1504	Addition of a security policy SECURITY.md to github.com/peeringdb/peeringdb	As title	YES
#1550	Improve campus visibility for the facility page on PeeringDB.com - UI change to improve the experience of using the campus object	Make it more obvious to web users when facilities are a part of a campus	Will check whether new design addresses this
#1556	Add Geocode to search results and export feature of IX Object	List the geocodes of all facilities in which the IX has a presence	YES
#1558	Improve IX object export data and capabilities	Make networks at a IX exportable from the web UI	Needs an implementation discussion
#1559	Rename "soft deleted" objects when users 'claim' a net/org/fac/car/ix name of a soft-deleted object	Users are getting a "name already exists" error when (re)claiming a soft deleted object	Needs an implementation discussion

Informational

No action required. Members should be aware that these new issues have been agreed since the last meeting.

Number	Title	Bug?	Summary
--------	-------	------	---------

#1452	v2 search does not find a fac in Charlotte, NC but finds an ix in a fac there	Yes	As title
#1528	pdb_rir_status task errors on deskpro ticket creation	Yes	The ticket created by pdb_rir_status currently is not tied to any user. DeskPRO requires a customer relationship either through user object or an email address.
#1520	In conjunction with #1455 - ANY organizations we resolve via RDAP lookups can end up under the same organization if organization names overlap	Yes	See: Org name RIPE-NCC-END-MNT for new networks issue
#1517	Searching for an AS number returns less than helpful search results	Yes	As title
#1501	.kmz export Notes in Description hides metadata in Google Earth Pro	Yes	As title
#1485	Invalid_client error on oauth	Yes	As title
#1473	Searching for specific facilities (so far Equinix) returns incorrect results	Yes	As title
#1462	Expanded IPv6 addresses not accepted when creating a netixlan object in the frontend	Yes	As title
#1446	v2 Search - extra facility results are returned with exact match search	Yes	In v2 search a search term enclosed in quotes e.g. "my search term" is an exact match search. Only results that return the exact match should be returned. Extra results are being returned on at least some searches.
#1248	Get "rir_status: This field cannot be blank." sorted out when reverting changes	Yes	When reverting changes, I now run into the error "rir_status: This field cannot be blank." every now and then. IMO this is a bug
#1084	Auto approving a network is not working properly	Yes	A second DeskPRO ticket is sometimes generated
#1076	You can't delete an IX if it still	Yes	As title

	has fac associated		
#1039	API GET Responses for full list retrievals sometimes fail with early termination error	Yes	As title
#1017	Deleting of a netixlan objects should lead to a complete removal from the DB	Yes	As title

Number	Title	Summary

AOB
